

Defence Civil Tendering and Procurement

Ese Rainey, Director Program Development and Delivery North East in Capital Facilities and Infrastructure

The Government's investment in enablers, set out in the 2016 Defence White Paper, such as information management and the Defence estate, including bases, wharves and runways, reflects how critical they are to the effective and efficient delivery of defence capability. Without these enablers Defence cannot generate the combat effects required to achieve the Strategic Defence Objectives.

Against this backdrop, Ms Ese Rainey, Director Program Development and Delivery North East in Capital Facilities and Infrastructure will present an overview of Capital Facilities and Infrastructure Branch, within the Infrastructure Division of Defence's Estate and Infrastructure Group. As part of this presentation, Ms Rainey will provide an overview of the Defence approval process, major contracts used by Defence and their characteristics, and a brief overview of key projects within the forward work plan.
